Projects to be located on:

Lynn School Campus- Lynn, Arkansas
Strawberry School Campus- Strawberry, Arkansas

ADDENDUM #4
March 18, 2021

Modifications or clarifications to original plans and specifications FOR BOTH PROJECTS UNLESS NOTED OTHERWISE:

1. Refer to addendum #3 item 1 -----The metal building manufacturers have been looking for clarification on this –In the Previous design of these

projects, the structural engineer required Intermediate Moment Framing In lieu of Ordinary Moment Framing. It's noticed this time that the Strawberry Campus has removed that requirement, but Lynn Campus still has it. Can you have someone verify with ECI if this requirement is valid on the Lynn Campus?

A revised response has been issued from ECI based on a code exception. The <u>REVISED</u> response from ECI:

The seismic design category for Lynn is C, therefore "ORDINARY MOMENT FRAMES" are permitted.

The seismic design category for Strawberry is C, therefore "ORDINARY MOMENT FRAMES" are permitted.

2. Friday March 19th at 12:00 pm (noon). Will be the cut-off time for questions on this project.

<p align="center">(End of addendum)</p>
